

AGENT SANCTUM // FULL BUILD KIT

from blank canvas to a live interactive AI-agent scene · ~25 min · \$0

● GPT IMAGES + CLAUDE CODE + ZERO BUILD

BRIEF

Build a single-page interactive fantasy tavern populated by 5 autonomous AI agents that walk between workstations, drink at the bar, chat in passing, and surface a live dashboard of their tasks on click. The whole thing lives in one self-contained tavern.html — drop in a browser, screen-record, post as an Instagram reel.

STEP 1 // GENERATE THE WORLD (chatgpt.com > GPT-Images)

paste this prompt to ChatGPT, ask for a 16:9 image, save as tavern-bg.png:

Pixel art 2D side-view fantasy tavern interior set inside a massive hollow ancient tree. 16:9 cinematic composition. Warm orange lantern glow. Stone fireplace far left. Wooden bar counter mid-scene with mugs, barrels, hanging herbs. Ornate carved bookshelves on the right stocked with potions and glowing tomes. A glowing blue rune circle etched into the cobblestone floor at center. Bioluminescent cyan mushrooms growing on the bark walls. Hanging lanterns from heavy wooden beams. Wooden ladder up to a loft. Moss and ivy accents. Stardew Valley meets Zelda BOTW atmosphere. Highly detailed painterly pixel art. No characters, no text, no UI.

then a second prompt for the cast — save as characters.png:

Five fantasy RPG character sprites in a single horizontal row, evenly spaced, transparent checkerboard background. Pixel art, full body front-facing, consistent scale and style across all five. 1) elderly wizard in deep blue robe holding a glowing rune-spellbook 2) young druid scout in green hooded cloak with cyan mushrooms growing from the hood 3) friendly alchemist in brown leather apron holding a glowing purple potion and an open book 4) elven bard in autumn-leaf cloak holding a small wooden lyre 5) dwarf knight in plate armor with a rune-etched warhammer and shield. Stardew Valley pixel art aesthetic. 16:9 layout.

STEP 2 // PROJECT SETUP (Mac terminal)

```
mkdir -p ~/Desktop/agent-tavern
cd ~/Desktop/agent-tavern
# drop tavern-bg.png + characters.png into this folder
# install Claude Code (one-time):
curl -fsSL https://claude.ai/install.sh | bash
claude login
claude # opens Claude Code in this folder
```

STEP 4 // RECORD & POST

Cmd+Ctrl+F to fullscreen Chrome. Cmd+Shift+5 -> Record Selected Portion. 20-30s. Click 1-2 agents mid-record to show the dashboard. AirDrop to phone. Post to IG.

STEP 3 // CLAUDE CODE CONFIG (paste this whole block)

ROLE

Senior creative engineer. Output ONE self-contained tavern.html. No build step, no framework.

INPUTS (in working directory)

tavern-bg.png 16:9 painted pixel-art tavern
characters.png 5 sprites on solid gray (~RGB 153+197)

BUILD STEPS

- Python+PIL: slice characters.png -> agent_0..4.png.
Strip gray bg (max-min<=10 AND 125<=r<=220) to alpha 0.
Auto-crop to bbox, pad 6px.
- Render tavern-bg.png as fixed 16:9 backdrop.
image-rendering: pixelated.
- Layer FX > sprites > particles > post FX.

5 AGENTS (name | role | station | accent)

SAGE	Research Agent	library	#9fb8ff
ELEN	Content Agent	grove	#8ae3b8
MAX	Developer Agent	alchemy	#ffd86a
MYRA	Analytics Agent	rune	#f0d090
REX	Ops & Security	bench	#c8e0ff

Each: 6 realistic role-tasks split active% | queued | done

BEHAVIOR (state machine)

working > walking > drinking > walking > working
working <=> chatting (within 180px, p=0.6)
dragged (player holding sprite – overrides all)
emote above head while working: cycle every 1.2-2.2s
bar visit: 25% chance between tasks, 2.5-4s
walk anim: ~2px vertical bob, no lean, flip on facing
after chat: resume PRIOR station and task

WORLD COORDS (1920x1080 design space)

FLOOR_TOP=740 FLOOR_BOT=1055
RUNE cx=960 cy=945 rx=200 ry=70 (forbidden walk-thru)
FIRE cx=92 cy=810
BAR x=820 y=860 LIBRARY x=1640 y=885
GROVE x=445 y=810 ALCHEMY x=610 y=870
RUNE_STN x=1140 y=920 BENCH x=1360 y=970

SPRITE VISIBILITY (mandatory)

dark halo behind + colored aura on floor (120px)
rim glow over body + 4-dir black outline pass
filter brightness(1.1) contrast(1.1) saturate(1.15)
crisp ground shadow ellipse

AMBIENT FX (globalCompositeOp = 'lighter')

rune circle: pulsing blue + rotating sparkles + cone
mushrooms: cyan radial pulse 0.7 + 0.3*sin(t*1.4+i)
fireplace: 3-layer flame + 22 rising embers
lanterns warm flicker · 30 fireflies · 60 dust motes
bench forge sparks ONLY when REX working at bench

UI

topbar: 'THE AGENT SANCTUM' Cinzel 900 + green pulse pill
CLICK agent -> large dashboard popup right side, ~440px:
sigil avatar | name | role | live status chip
stats: Uptime · Completed · Queue
tasks: In Progress (animated bars + live %), Queued,
Recently Completed (strikethrough)
DRAG: pointerdown grabs, pointermove tracks, pointerup
drops. Quick click (<220ms, <5px) opens card instead.

POST FX & DELIVERY

vignette + film grain (alpha 16) over everything
when done: open -a 'Google Chrome' tavern.html
