1 IMPORTANT DISCLAIMER

THIS IS NOT FINANCIAL ADVICE. This guide is for educational purposes only. Everything runs in Paper Trading mode (fake money, real market prices). You risk ZERO real dollars. Get each bot working risk-free first before considering live trading.

2 WHAT YOU WILL BUILD

- Level 1 — Setup:** Connect Claude to a brokerage and place your first trade by talking to it.
- Level 2 — Copy Trading:** A bot that tracks what US politicians & Wall Street whales buy, and copies them automatically.
- Level 3 — Options Income:** A bot that runs the "wheel strategy" — collecting income whether the stock goes up, down, or sideways.

Why This Works

FEATURE	BENEFIT
Real-time research	Pulls Capitol Trades & news data live
Strict rule following	Never deviates from your defined strategy
24/7 without emotion	Runs while you sleep — no fear, no greed
No coding needed	Plain English prompts only

3 LEVEL 1 — BASIC SETUP

Claude + Alpaca Paper Trading

STEP 1 · DOWNLOAD CLAUDE DESKTOP APP

Go to claude.com/download (Mac or Windows). Claude Pro or higher is recommended for uninterrupted bot operation.

STEP 2 · CREATE ALPACA PAPER TRADING ACCOUNT

1. Go to alpaca.markets — sign up for free.
2. In the dashboard, switch to **Paper Trading** mode.
3. Create a new account named "**Trading Claude**".
4. Fund it with **\$50,000 practice money** — zero real dollars at risk.

STEP 3 · GET API KEYS

In Alpaca Dashboard → **API Keys** → Generate New API Keys.

You will receive three values — save them all:

• **Endpoint** • **Key** • **Secret**

STEP 4 · CONNECT CLAUDE TO ALPACA

1. Open Claude Desktop → create a folder called "**trading**" under Documents.
2. Paste your three API keys into a clearly labelled text file inside that folder.

STEP 5 · TEST THE CONNECTION

Use this prompt in Claude Desktop:

```
Connect to my Alpaca Paper Account using the API keys from the 'trading' folder.  
Buy 1 share of Apple (AAPL) as a test and confirm the trade.
```

Check your Alpaca dashboard — you should see 1 share of AAPL appear. From now on you can simply say: **"Sell that Apple share and buy one Tesla share."**

STEP 6 · SAVE CREDENTIALS PERMANENTLY

Use this prompt once to avoid re-entering keys every session:

```
Save the Alpaca API keys securely in the 'trading' folder so I don't have to paste them every time.
```

4 LEVEL 2 — COPY TRADING BOT

Mirror Congress & Whale Trades Automatically

Part A: Safety Rules First

RULE	HOW IT WORKS
Trailing Stop	Locks in profits — the stop only moves up, never down
Ladder Buys	Buys more on dips for a better average entry price

Safety Prompt:

Teach me Trailing Stops and Ladder Buys. Explain the logic and apply these rules to all future trades.

Part B: Run on a Schedule

Create a recurring task that checks the market every 5 minutes during trading hours (Mon-Fri 9am-4pm ET) and executes according to our rules.

Check the **clock icon** on the left sidebar in Claude to see running tasks. The bot runs as long as your computer is on.

Part C: Copy Congress & Whales

Best Source: capitoltrades.com (free) — tracks all reported trades from US Congress members in real time.

Legal requirement: Politicians must report trades within 45 days under the STOCK Act.

Setup Steps:

- Create a **second Alpaca Paper account** (separate API keys — keeps bots isolated).
- Start a **new Claude session** and add the second account's keys.
- Paste the Congress Copy Prompt below:

Connect to capitoltrades.com. Find the top-performing Congress members. Create a Copy-Trading Bot that automatically mirrors their trades using our Trailing Stops and Ladder Buys. Check every 5-15 minutes during market hours.

Ask anytime: **"Who are you copying right now and why?"**

5 LEVEL 3 — WHEEL STRATEGY

Options Income — Works in Any Market Direction

How the Wheel Works (Tesla ~\$250 example)

PHASE	ACTION	RESULT
1	Sell a Put at \$230 strike	Collect premium immediately
2	If NOT assigned: keep premium & repeat	Pure income, no stock needed
3	If assigned: buy shares cheap	Premium already reduces cost basis
4	Sell Covered Calls on those shares	Collect more premium on top
5	If called away: shares sold at profit	Wheel spins again from Phase 1

■ Works in UP markets, DOWN markets, and SIDEWAYS markets — as long as you choose stable, liquid stocks like Apple or Tesla.

Wheel Bot Setup Prompt

Set up a Wheel Strategy Bot on the Trading Claude account using stable stocks like Apple or Tesla. Choose reasonable strikes, apply safety rules, and run on a schedule during market hours.

After setup: Claude handles strike selection, rolling, and full management. You only check in once per day.

6 QUICK RECAP & NEXT STEPS

Checklist

✓	Claude Desktop + Alpaca Paper account connected
✓	Test trade completed (1 share AAPL)
✓	Safety rules + scheduled bot running (Level 2)
✓	Congress Copy Bot active on second account
✓	Wheel Strategy Bot running (Level 3)

Next Steps

TIMELINE	ACTION
Week 1–2	Complete Level 1 — verify the test trade works
Week 2–3	Build & test Level 2 — Congress Copy Bot
Week 3–4	Activate Level 3 — Wheel Strategy
After 4 weeks	Review daily summaries, refine rules — then decide on going live

The bots run as long as your computer is on.
Stress-test scenarios and refine rules as needed.

Good luck — and happy trading!
